

 FGTechnology
**Micro:** ST10F280**Driver:** ST10F280 BOOT MODE
 FGTechnology
**Micro:** ST10F296**Driver:** ST10F296 BOOT MODE

Le possono avere 2 tipi di pinout:

*The can have 2 type of pinout:*

### 1 - Type A

### 2 - Type B

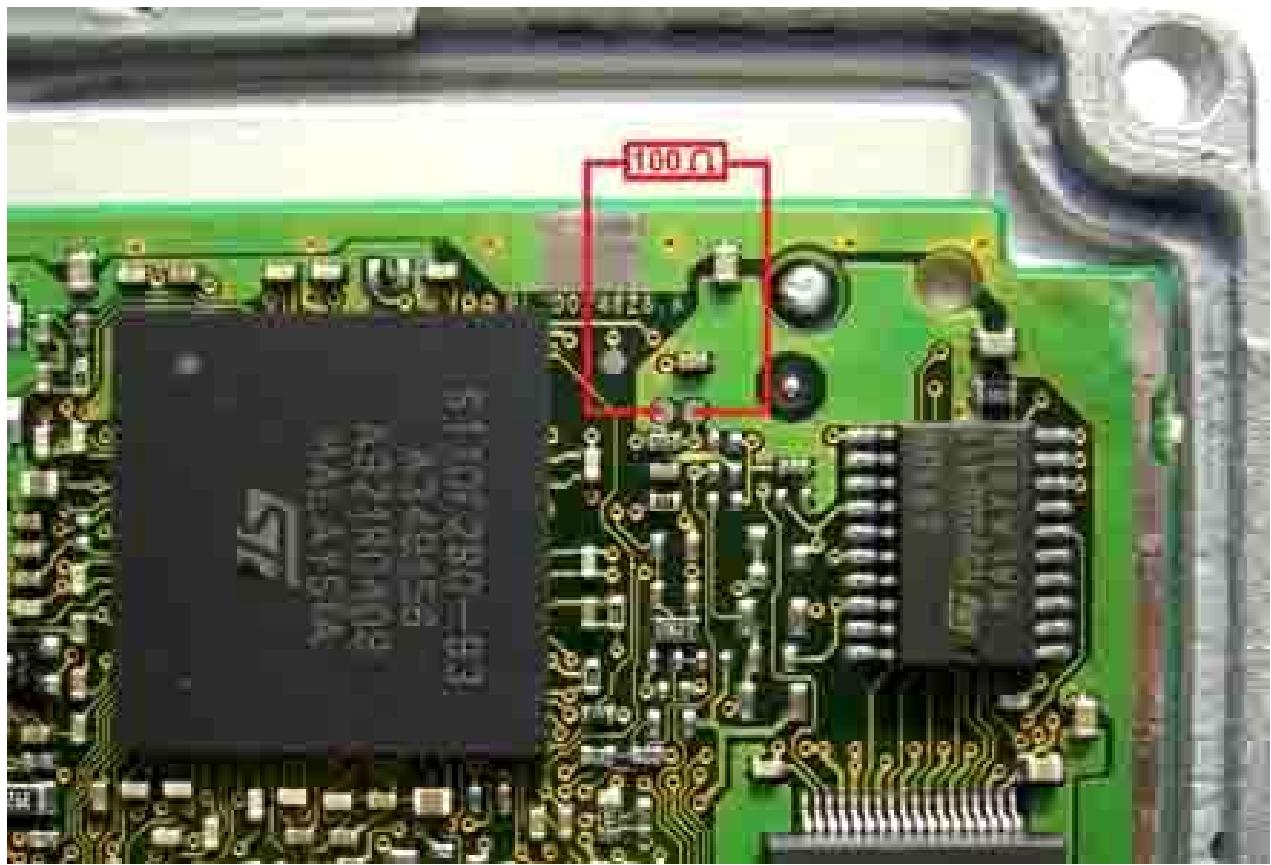

Alimentare la centralina seguendo le indicazioni sopra riportate in base al tipo di connettore A o B.

*Feed the ECU following the indications above you bring again in based to the type of connector A or B.*

Queste ECU possono differenziare anche nello schema elettrico; di seguito riportiamo i casi possibili che mostrano come applicare la resistenza da 100 Ohm per porre la centralina in boot.

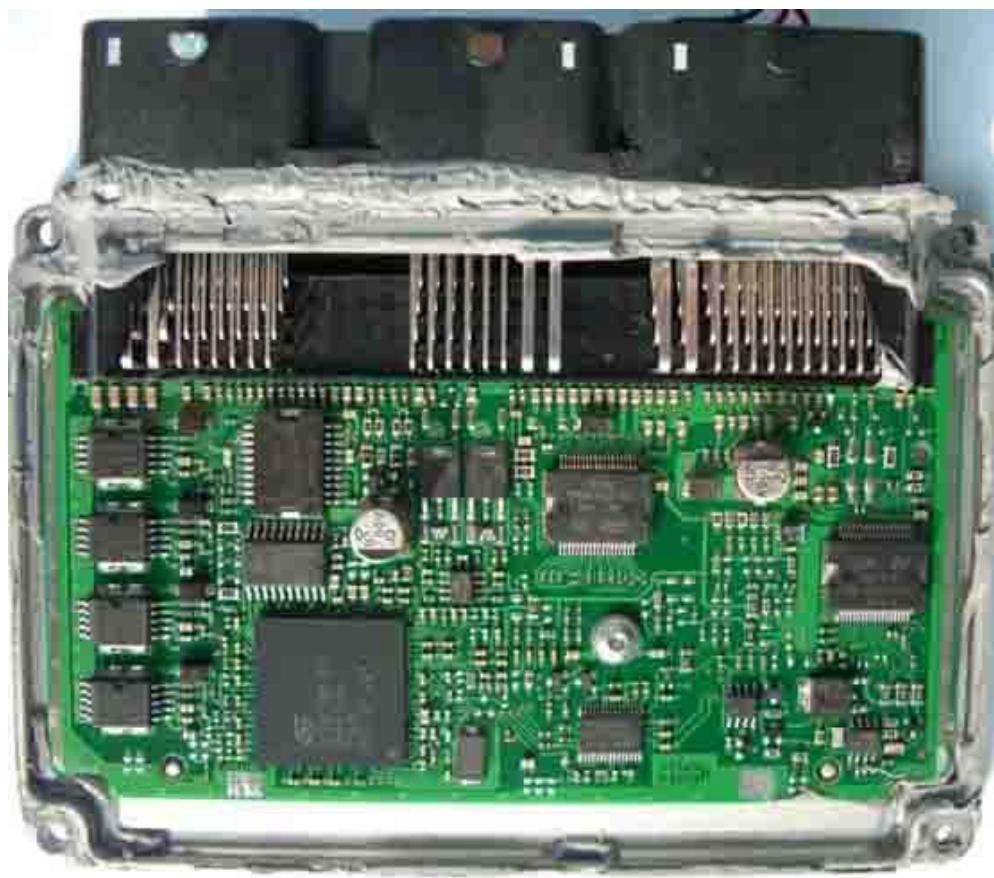

*These ECU could also differentiate in the electric scheme; of succession we bring again the cases possible that show how apply the resistance from 100 Ohm for set the ECU in boot.*

- Primo caso / First case

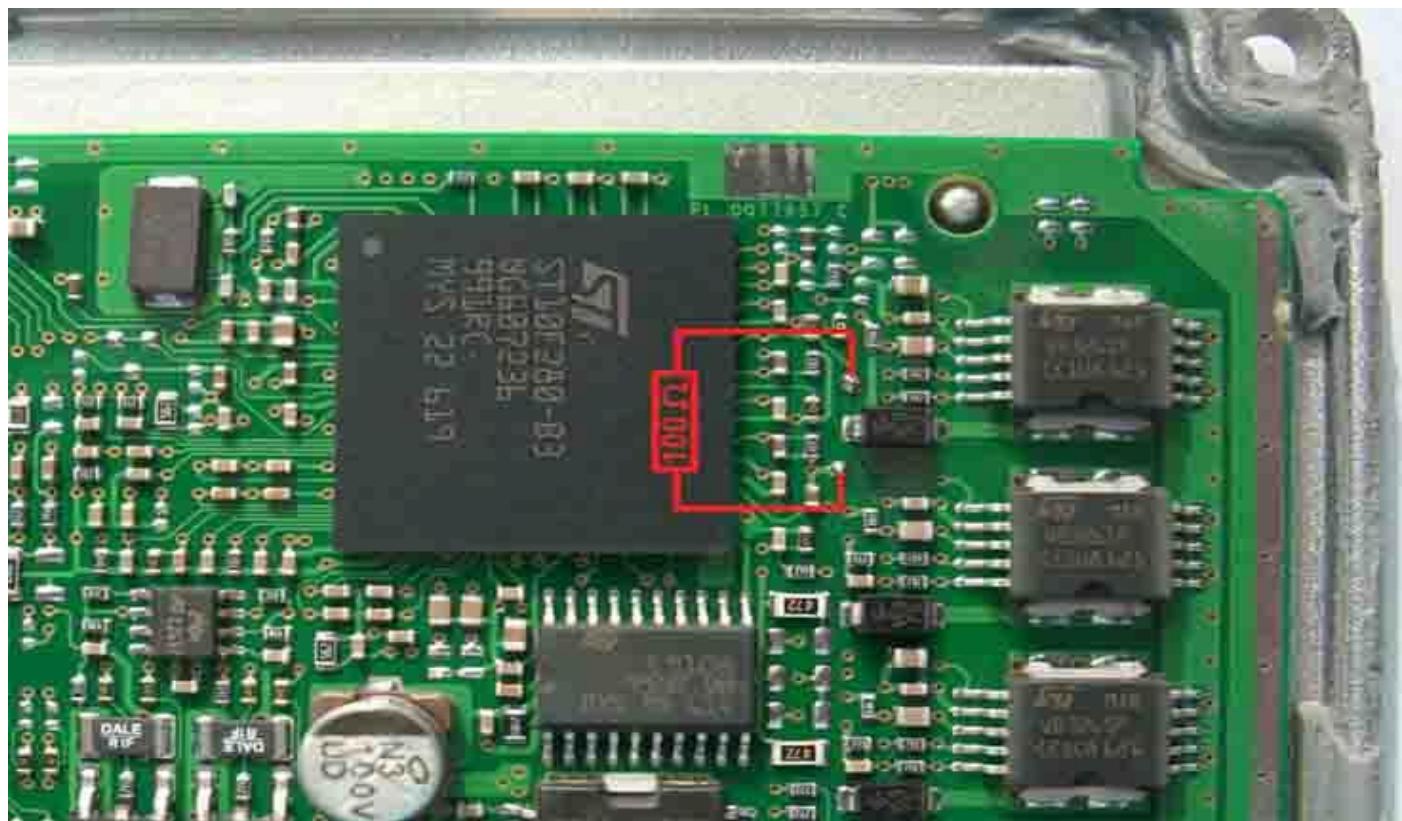

- **Secondo caso / Second case**

**PSA IAW 6LPx – 6KPB**

**N.B. Queste ECU possono avere un processore ST10F280 oppure ST10F296.**

These ECU can have a processor ST10F280 or ST10F296.

**Terzo caso / Third case**
